Nancy,

We appreciate all of the work that you did on our PWS for Option 5.

We added some clarifying language under the QA section. Because the SQAPP specifically references the tasks in the previous work assignments, we tried to preserve these tasks in the Option 5 work assignment so the SQAPP that was developed previously will be more readily applicable. We wouldn't want to have Cadmus spend time developing a new SQAPP just to help us with this "clean-up" work under Option 5 when the QA process for secondary data is already covered in the SQAPP. The way you included the previous Tasks in a reference section is a great idea, and provides the necessary link to the SQAPP.

If we have to renumber the tasks, as you mentioned, then it might take some more rework to keep the SQAPP applicable to this work. If that needs to be done let me know, and we will take care of it. No need for you to work on that.

Thank you for all of your assistance on this.

Hi Bruce, I've rearranged your PWS because I think CAD would give us trouble over including the completed work. I've cut and pasted all the completed tasks into a reference section at the back of the PWS. Please reread what I've done above, make edits plus most importantly let me know if you agree with this approach. I believe CAD may make us renumber the task 4 as a task 1, which makes it even more important that we make it clear what has been done under what tasks and what remains to be done. Thanks...

Nancy,

Attached are most of the items for the subject work assignment package, excluding the two QA forms. I routed the two QA forms to our Region 8 QA Director, and will forward those to you after they are approved.
